

TriLumen Systems

PROUDLY HUMAN SYSTEMS

Systems that drive *real clarity*

TriLumen Systems is a proudly human systems and AI consulting company that builds what works and trains the people who run it. We help mid-size businesses modernize with BI, AI automation, cloud migrations, and the change management that makes it stick.

WHAT WE DO

BI

BI Reporting & Dashboards

We build the dashboards and scorecards leadership actually trusts to run the business — not reports that get generated once and ignored.

AI

Copilot & AI Automation

We deploy Microsoft Copilot and design AI-assisted workflows that remove manual, repetitive work — built with your team, not around them.

Cl

SharePoint & Cloud Migrations

Company-wide intranets and cloud migrations designed for real adoption, not just a completed deployment checklist.

Ch

Change Management & Adoption

The best system in the world fails if nobody uses it. We build the training and rollout plan that makes it stick.

Er

ERP & WMS Support

Guidance and hands-on support for ERP, warehouse management, and delivery platforms — we work with whatever system you run.

Au

Workflow Automation

Power Automate-driven automation that eliminates manual, repetitive tasks and frees your team for higher-value work.

WHY TRILUMEN

Change Management Built In

Most technical vendors stop once a system is installed. We build training and adoption into every engagement from day one.

Proudly Human

Dashboards, automation, and AI can tell you what happened. It still takes people to know what to do about it.

Experience at Any Scale

Our systems experience spans national retailers, manufacturers, and government contractors — 10 people or 10,000.

GETTING STARTED

Free Strategy Call

A no-commitment conversation about what's slowing your team down — no pitch, just a real look at where you stand.

Systems & Automation Assessment

A flat-fee, in-depth review of your current systems and workflows, ending in a written set of prioritized recommendations — credited toward your project if you move forward.

Systems experience spanning national retailers, manufacturers, and government contractors — the same expertise, whether your team has 10 people or 10,000.
