

TriLumen Systems

PROUDLY HUMAN SYSTEMS

Systems Help, Sized for a *Small Team*

You don't need a five-step enterprise rollout to fix a broken automation or get your first real dashboard. We work in the tools you already run on, with pricing that makes sense for a team wearing five hats.

BUILT FOR THE TOOLS YOU ALREADY USE

QuickBooks Online

HubSpot

Zapier

Make.com

Airtable

SOUND ABOUT RIGHT?

Nobody has time to "own" your systems

A workflow that quietly broke months ago

A spreadsheet doing a dashboard's job

Tools that don't talk to each other

START SMALL

3-Hour Automation Audit \$375

We look at one broken or clunky automation, figure out what's actually going wrong, and hand you a clear write-up.

- One automation or workflow reviewed
- Root-cause write-up
- Fix recommendations you can act on

Single Dashboard Build \$950

One real dashboard, built in the tool you already use, pulling from your actual data.

- One dashboard, one data source
- Built in QuickBooks, HubSpot, Airtable, etc.
- A short walkthrough so you know how to read it

NEED SOMEONE ON CALL?

Starter Retainer \$600/mo

5 hours a month

Enough to keep the small stuff from piling up — a broken automation, a dashboard tweak, a quick question answered.

Growth Retainer \$1,100/mo

10 hours a month

For teams actively building out their systems — more room for new automations, dashboard builds, and bigger fixes.

WHY TRILUMEN

No Enterprise Runaround

Fixed prices, fixed scope. A real deliverable, not a sales pitch for something bigger than you need.

We Work in Your Tools

No pressure to switch platforms — we build in QuickBooks, HubSpot, Zapier, Make, and Airtable, the tools you already run.

Room to Grow

Outgrow this tier? We also handle full ERP migrations and enterprise-scale systems when you're ready.

Let's Figure Out What You Need
